THE grapevine dispatches seem to have sirred up more malodorous contention in the lower part of the State, than in this section where they were better under-good. The Charleston Gazette, noting the mention of the name of President Thompson, of the State University, as one of the alleged conspirators against the peace and dignity of the Democratic party in this State, wants to know how that institution could dispense with the services of its official head in the midst of a session, and the Courier, stating that Thompson's business in Washington was solely for the purpose of procuring a military instructor for the University Calet Corps, refers to the editor of the Gazete as having "accomplishments which he might well have acquired under the schooling of skunks."

We understand that there is some tall amet's members of the various lodges of the Lidependent Order of Odd Fellows in this city, as to purchasing the property of the Wheeling Library Association, if a satisfactory arrangement can be made, and transferring the library to its old quarters in the Odd Fellows' Building. If the de talls of the proposed plan now talked of can be worked out, it is intended that the fibrary shall still be open to the public on terms no more burdensome than those now fixed, but that the library shall be owned, managed and kept up by the Odd Fellows organization.
It is probable that the library thus con

There are about two thousand members of the Order in this city, and most of them would be inclinel to use the library were it transferred as proposed and kept open at conve public was admitted to equal privileges be, at least as likely to serve the purpose for which it was intended as at present and would be secure against the misadven tures which now threaten it.

As we understand it, the proposition is as yet in an inchoate state, and will not take any definite shape until the commit-tees of the various lodges meet and consider it. We refer to the matter only be cause a good many of our readers are indin the library and the Order which

DISTRICT DELEGATES TO CHICAGO. WASHINGTON, February 8 .- In order to keep the mob away from the hall yester day, the report was circulated that Convention had adjourned over to Monday. Hence the selection of delegate night was a surprise to many. even now it is impossible to tell with certainty whom the delegates are for. Their friends do not agree. Cook is regarded that many of Sherman's friends worked

for Cook's appointment. In all the confusion as to this, it is at least certain that most confident he would be selected. It is intimated in the Sunday papers to-day that Bob can go to Illinois and get himself nominated as a delegate, and thus not lose his second chance to put Blaine in nomination with a mighty speech. BLOW WORK OF CONGRESS.

Business in Congress is already far be-hind hand, and getting more so every week. The House has spent a great part of the time since the recess in discussing the proposed revision of the rules, and is yet far from the end. Indeed, it is still in the thick of a hot fight over the control of the Appropriations Committee, continuing their efforts to cripple its powers, upon which they have already trenched by taking from it the control of expendiupon which they have already trenched by taking from it the control of expenditures for river and harbor improvements, Agricultural Department and public buildings. Manwhile the Appropriations Committee dees not consider it wise to report any more bills, and everything awaits the completion of the discussion over the rules, which threatens to run on for days or weeks yet. The Senate is taken the control of the discussion where the rules, which threatens to run on for days or weeks yet. The Senate is taken the rules which the rules which

report any more bills, and everything awaits the completion of the discussion over the rules, which threatens to run on for days or weeks yet. The Senate is taking matters quite as easily as the House, and Mr. Hear, in giving stricter attention to business the other day, declared that he had never known a session where so little had been accomplished at this stage. It is evident enough that all hopes of a short session may as well be given up.

umberland News.

The Republican National Convention, territory and the District of Columbia: tors, 8 territories and the District, and that number doubled makes 709. It will thus require 379 votes to nominate. Counting as certain 58 from Pennsylvania, 70 from New York and 42 from Illinois, General Grant will have 170 of the 379 declared for him in a very short time, and it looks now very much as if the force of circumstances would compel him to become a candidate, for if he withdraws it will be said that he has done so only siter the result in Pennsylvania.

Grant may prove a formidable candidate for the nomination, though the small majority of twenty votes for him in Pennsylvania the other day, in spite of the strong efforts of such a skillful manager as Senator Cameron, has damaged his "boom" very much.

The Democratic National convention consists of only 738 delegates, those from the territories and District of Columbia not being permitted to vote. Under the present two-thirds rule it will require 492 votes to nominate. There has always been much objection to this, and several attempts have been made to rescind it. attempts have been made to rescind it. The Albany Press and Knickerbocker, of January 10th, says: Mr. S. G. Gregory, of this city, has just completed a full working model of his last invention. It is an air ship, and has occupied the entire time of the inventor for many months. The vessel is sharp at both bow and stern, time of the inventor for many months. The vessel is sharp at both bow and stern, the better to overcome the resistance of the atmosphere. At either end are placed driving wheels and rudders. The latter are controlled by one wheel, situated amidship. The cylinders, which contain 30,000 cubic feet of pure hydrogen each, are constructed of four thicknesses of silk, the ends being tipped with brass and the whole lashed to the gunwale by cords. At either end are placed elevators or depressors, controlled upon the principle of an Archimedian screw. The sleeping reoms, dining rooms and cargo are all provided for in the hold of the vessel. Mr. Gregory says that the cylinders will sustain a weight of 10,000 pounds, and that the speed will be over 30 miles an hour. A trip to Europe can be made in four days. The rudders are in a line with the keel, and serve to turn the boat as required. It is intended to sail the boat as required. It is intended to sail the boat at an altitude of 10,000 feet. In case of a storm, It is proposed to build an exhibition ship, after which Mr. Gregory will "fly" to Europe, starting in the month of of July. MADRID. February 7.—At 11 o'clock this morning people crowded the passage and small court-room where the Tribune sat to hear the case of Ottero, the would-be regicide. Spanish law does not require the presence of the acquest. Only his counsel and attorney appeared. Both were lyoung men. The Judge sat under a dais, with this public prosecutor on his right, and on the table below lay a brief covering 102 pages, a case of double-barrelled pistols which had served to commit the crime, and another pistol with which the accused had practiced. The prosecutor had shown premeditation in preparing his plan—once when lying-in wait, without success, during the day before December 30th. The accusation invoked the testimony of two physicians to prove the sanity of Ottero, and produced his confession besides.

On the side of the accused the advocate pleaded the imbecility of his client, founding his defense on the written testimony of two surgeons, one the director of a lunation should be an imbecile and actuated by a monomania for suicide long before the crime, and said that his very limited intellect had been entirely dominated by the idea of perishing in the act of shooting the King.

HAVANA, February 2.—A treaty has been signed between China and Spain, by which the Chinamen can be contracted for to labor in Cuba, as heretolors. On Saturday night the Grant party, except Gen. Grant, were present at the family reception of Pedro Dias Herrara, a navy captain. The General remained at home, having received a telegram announcing the death of his friend, Adolph E. Borle, yesterday afternoon. The party drove about the city viewing the carnival sports. To-might they will attend the usual Mon-To-night they will attend the usual A day reception of Gen. IRELAND.

There is generally a more hopeful spirit among the people. New applications for loans by land owners the past week have reached two hundred. The amount applied for is £111,000; since the 22d of November £376,000. The Board of Public Works takes care that laborers are paid in cash and that the amount of the first issue has been expended and substantial relief afforded before they give a second instalment.

DUBLIN THEATRE ROYAL BURNED

DUBLIN THEATRE ROYAL BURNED.

DUBLIN, February 9.—The Theatre Royal was completely destroyed by fire and is still burning. The adjoining buildings are endangered. The Police Inspector and one workman were injured. The military keep order and assist the fire department. There was to have been a day performance of pantomine this afternoon, at which the Duke and Duchess of Marliborough, were to be present. The fire was occasioned by the ignition of the curtains of one of the stage boxes.

The fire at the Theatre Royal is still burning. It is feared the manager of the theatre, the property man and four assistants perished in the flames.

Six lives were lost in the fire at the Theatre Royal, Lord Lieutenaut of Ireland was present during the conflagration. The loss by destruction of the theatre and contents is estimated at 200,000 pounds.

BUSSIA.

LONDON, February 9.—Intelligence has been received from St. Petersburg that the editors of the Will of the People, a Nihilist organ, have published a notice that in consequence of the seizure of their printing press, the issue of the third number of the paper has been interrupted, but will be resumed shortly.

St. Patersburg, February 9.—The Menonites, heretofore except from military service on account of their religion, will this year furnish a contingent of 130 men. The Golos has intelligence from Fans Caucasans that the condition of the inhabitants of Shalen Dalyez district is terrible. A quantity of breadstuffs have been seiz-

AFGHANISTAN.

CALCUTTA, February 9.—Looshki Alum and Mahomed Jan, call upon their tribes to renew the attack upon the British. The Kohistans' and Ghlizais' are ready.

London, February 9.—A dispatch from Cabul says: There is no present indication of any chief, possessing ability or influence, to take the real command of the country. In fact it daily becomes more apparent, that Afghanistan is not a nation which can be held together by any but a very extraordinary man. We probably have heard the last of the United Afghanistan, and that for some, it seems that the only power which could build up Afghanistan into a solid and united kingdom, is England.

LONDON, February 9.-A Berlin special London, February 9.—A Berlin special says the condition of peace between the Church and State will probably be the consent of the Vatican to recognize the State's right to control the education and nomination of Catholic priests, and in return for this a repeal of all the other clauses of the Falk laws which have been passed for the purpose of coercing the clergy. The Centre party will probably object to the recognition of this fundamental clause of May laws, but as the same prescriptions are enforced in other countries the Vatican cannot oppose them.

CHINA'S HESITATION.

CHINA'S HESITATION.

London, February 9.—A Vienna dispatch says China's hesitation to ratify the Kuldja treaty, on the plea that its representative overstepped his powers, has caused some uneasiness in St. Petersburg, as trouble with China might interfere with the Turcoman expedition. Even if China nominally preserves the peace, her viceroy on the frontier, Tzo Tsung Kang, conqueror of Kashgari, who has regarded very impatiently the negotiations about Kuldja, seems a very likely man to make an expedition on his own account, without troubling his Government for formal permission.

PERSIA AND ENGLAND.

London, February 9.—The Times has reason to believe that directions have been sent to the British Minister at Terehau, to inform the Persian Government that Her Majesty's Government releases Persia from the treaty engagement of 1857, by which Persia bound herself not to take possession of Herat. This is tantamount on an anymation to Persia to do the thing she is thus expressly permitted to do. The Times adds: "We seem in effect to have handed Herat over to Persia with a view of uniting the interests of Persia and India in opposition to Russia."

RUSSIA AND ENGLAND.

London, February 9.—A Vienna correspondent says: Lobanoff, the Russian Ambassador at London, has received fresh orders from his government to hint in his discussion with the English Cabinet on Asiatic affairs that Russia considers Herat as lying beyond England's sphere and she could not, therefore, suffer Herat to be exclusively subordinated to British influence.

LONDON, February 9.—A Constantinople special reports that during a fete a barrack three stories high near that city suddenly collapsed and two hundred solidiers were killed and three hundred wounded.

9. Slacked lime added to vegetable matter causes it to give off its nitrogen in the form of ammonia. Upon soils in which ammonia is combined with acids, it sets free the ammonia, which is seized upon by the plants.

10. Its solubility in water causes it to sink into and ameliorate the subsoil When the soil contains fragments of granite or trap rocks, lime hastens their decomposition and liberates the silicates.

11. Its combination with the acids in the soil produces saline compounds, such as potash, soda, etc.
